

Privacy-Aware Flow Control for Personal Data

EuroDW 2018

Yousef Amar

3rd Year PhD Student in Privacy-Preserving Networked Systems

Supervisor: Hamed Haddadi <h.haddadi@imperial.ac.uk>

2018-04-23

Summary of Research

- ▶ Privacy over personal data, especially IoT, is opaque, for access control and job distribution
- ▶ Without privacy-aware systems, control over personal data is limited and processors need to jump legal hoops
- ▶ Our work will automate real-time privacy-aware access control and job distribution
- ▶ Thus, the flow of data in networks of producers and consumers is regulated by the privacy contexts
