

SCA 2012 Poster Submission Details

Important Dates

- June 30th, 2012: Deadline for poster submissions
- July 12th, 2012: Notification of poster acceptance
- July 16th, 2012: Camera-ready posters due
- July 29th-31st, 2012: Symposium

Format

The poster submission should consist of a PDF formatted according to the same EG style as full SCA papers, and be no more than 2 pages in length. Please note that this template is slightly different from the full papers template, so if you already have the full papers template, you should still download this one. Submissions must be camera-ready, with author names and affiliations listed. The review process will be single blind. The LaTeX template: [egPublStyle-SCA2012-posters.zip](#)

Electronic Submission

All PDF poster submissions should be submitted via email to SCA2012.Posters@gmail.com by the deadline. Due to GMail's limits, each email message must be less than 25MB. If this is not sufficient for your submission or supplemental materials, you may send your submission in parts as attachments to several emails. For supplemental materials, links to external websites are also allowable.

Supplementary Materials

The submission of supplementary materials is not required, but a draft of the poster of size A0 in PDF format is encouraged. For the final presentation, videos and interactive demonstrations are highly encouraged. We will provide electrical outlets and tables so that authors can display such demonstrations using their own equipment.

Fast Forward Slide

Authors of accepted posters will be required to provide a PowerPoint slide describing their work for the poster fast forward presentation session. A slide template and video guidelines will be provided to presenters.
